

## **McKesson Cardiology™ – BCIS Support**

### **Helping ensure compliance with BCIS reporting requirements**

Collection and submission of British Cardiac Intervention Society (BCIS) data can be burdensome for clinicians and administrators. It is widely acknowledged that Clinician participation is critically important.

By enforcing validation rules within the cath reporting process, McKesson Cardiology helps clinicians and administrators fulfill BCIS registry reporting guidelines and submit accurate information the first time. Front-end validation helps to minimise data discrepancies that are discovered as procedure data is reported, saving valuable time. For ease of use, data is accessible for completion and submission from both hospital workstations and remote locations using McKesson Cardiology Distributed.

The intuitive cath reporting workflow built into McKesson Cardiology helps clinicians understand what data should be completed to comply with BCIS registry requirements. Validation is executed before a clinician can sign the Cath report. Errors or missing data are highlighted and can be immediately corrected. After the clinician signature, administrative BCIS fields remain open for editing, which allows the administrator to complete their

work without requiring the clinician to re-sign the report.

McKesson Cardiology supports BCIS registry requirements by including built-in filtering of fields and lists to help ensure that reports are completed correctly without conflicting values. BCIS data is automatically distributed, where applicable, into the appropriate fields to reduce the amount of work necessary to complete reporting. Compliance levels for BCIS reporting can be configured according to organisational preferences or workflows. For example, the organisation can decide whether to require clinicians to correct data completeness errors or not.

McKesson Cardiology Cath report including BCIS support helps your organisation meet regulatory reporting requirements by automating many processes and validating reports – without disrupting the daily workflow of clinicians and administrators.

#### **Contact us**

For more information about McKesson Cardiology Cath report and BCIS support, contact us by email to [UKCardiologySales@mckesson.co.uk](mailto:UKCardiologySales@mckesson.co.uk) or visit <http://www.mckessonimaging.co.uk/cardiology>.

#### **Benefits**

##### **McKesson Cardiology BCIS Support helps Organisations:**

- Ensure completeness of valid BCIS data before clinician sign-off
- Minimise data discrepancies in procedure data
- Edit BCIS data after clinician sign-off
- Work with BCIS data from hospital and remote locations

#### **Features**

##### **McKesson Cardiology BCIS Support helps Organisations:**

- Enforce BCIS guidelines during reporting
- Encourage BCIS registry compliance through intuitive workflow
- Configure compliance levels by site
