

Change Healthcare Stratus Imaging Analytics

Refine your imaging operations

Gathering clear data and actionable insights on your medical imaging workflow and supporting IT processes can be challenging, especially given the typical profusion of siloed reporting systems. Reports on imaging archive updates, dictation, workflow, EPR, and ordering are adequate for local needs, but do not contribute to systemic performance improvement.

To balance workload and optimise processes, your leadership needs an accurate, holistic view of current and historic activity within your imaging department and enterprise. Change Healthcare Stratus Imaging Analytics (Analytics) transforms aggregated, multi-source data into visually rich reporting to help improve your imaging operations.

Optum

Leverage your imaging data to drive performance improvements

Data discovery, measurement, comparison, and prediction tools help your team leverage analytics to explore common use cases and improve operational performance.

Visualise your performance data

Analytics is a scalable, cloud-native imaging analytics platform that automates data acquisition and synthesises complex data from multiple sources. The platform provides dynamic data visualisations, key performance indicators, and problem-specific analytic workflows to help you rapidly realise meaningful insights.

Built on cloud-technology/services, the cloud-native platform follows third-party best-practice cybersecurity standards and offers guaranteed 99.99% uptime. Upgrades are frequent, automatic, and seamless to your staff.

Analytics is currently offered as a subscription-based solution as a service (SaaS).

Gain meaningful insights, fast

Optimise your organisational efficiency with ad hoc or standardised activity reports that can be exported and shared.

- Historical data, descriptive analytics, volumes, basic turnaround times (TAT)
- Departmental activity reporting
- Established data governance and aggregated analytics
- Additional standard data sets, including complete TAT trends and outliers, unreported studies, and productivity data
- Capacity and utilisation metrics, plus staff utilisation and productivity data
- Referral management data
- Comparative benchmarking
- Data consumed via interactive dashboards

Connect to our cloud-native platform

Analytics is part of Change Healthcare Stratus Imaging, a cloud-native SaaS platform. This next-generation platform is designed to help providers achieve better clinical and operational outcomes, including faster throughput and tighter security standards.

As individual components of Change Healthcare Stratus Imaging are introduced to the market, customers can gradually transition to a fully cloud-native imaging platform to achieve additional improvements in data transmission, interoperability, cross-discipline collaboration, and innovations in clinical capabilities.
